

Diamonds are a
hot tub's **best friend**

ACE™
Salt Water Sanitizing System

Experience luxurious water through diamond technology

Introducing the ACE Salt Water Sanitation System. The ACE system is an advanced salt water chlorine generating system designed specifically for the Hot Spring Spa. The benefits of a salt water chlorine generating system over and above the obvious (less work to maintain your water chemistry) is that the ACE system does NOT depend on expensive, harsh chemicals like chlorine, bromine or other man-made sanitizers but rather salt, a much cheaper commodity. With the ACE system, the soakers do not have to worry about green hair, itchy eyes or skin problems, or storing large quantities of harmful chemicals. While pH levels still need to be tested, there is less work involved in maintaining an ACE spa versus a spa treated with traditional chemicals.

Consumer Benefits of ACE

1. Perfect looking spa water that is perfectly safe to use.
2. Chlorine is water's best sanitizer, and natural chlorine is the best chlorine.
3. Naturally chlorinated water does not smell.
4. Naturally chlorinated water does not irritate skin or eyes.
5. Soft water feels the best.
6. Fewer drain and fills are required annually – less work, less water, less power (fewer heat-ups).
7. No chemicals to buy, no chemical bottles to recycle.
8. Spa is always hot and always ready to enjoy – when you use your spa more often, you get more value for your money.
9. Control panel clearly and easily tells you the system is working.
10. Sanitizer level is easily verifiable, simply “dip a strip.”
11. Top side location of cell is easily accessed for quick cleaning and maintenance.
12. Less corrosion means fewer equipment breakdowns/warranty issues.
